## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 12, it is unclear what is meant by or the like. "Or the like" is considered to be indefinite.

The term "or like material" in the context of the limitation "coke, brick, or like material" was held to render the claim indefinite since it was not clear how the materials other than coke or brick had to resemble the two specified materials to satisfy the limitations of the claim. *Ex parte Caldwell*, 1906 C.D. 58 (Comm'r Pat. 1906).

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kullas et al U.S. Pat. No. 6,436,072 in view of Bonnici et al. U.S. Pat. No. 5,304,163.

Kullas discloses a surgical irrigator, comprising a pumping unit (1) having an inlet (10) and an outlet (12), note: (10 and 12 will be used to represent the inlet and outlet of the pumping unit and inlet/outlet tubing) and tubing connected to the outlet of said pumping unit (fig.1), said

Art Unit: 3763

pumping unit including means for supporting the pumping unit on a pole or the like (50), a flexible tube connecting at one end to said inlet (10), and a spike connected to the other end of said flexible tube (14). Kullas does not disclose the spike being coated with a lubricant (silicone). Bonnici discloses a spike being coated with a lubricant (col. 5, lines 14-28). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the spike of Kullas with a lubricant (silicone) as taught by Bonnici so that penetration can be aided by use of a suitable lubricant on the spike such as silicone oil.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 12 and 13 provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 21-23 of copending Application No. 09/668/178. Although the conflicting claims are not identical, they are not patentably distinct from each other because the scope of the claims are the same such that both are claiming a pumping unit having an inlet and outlet, means for supporting the pumping unit on a pole **or the like**, a spike, a lubricant and silicone.

Art Unit: 3763

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
